Displacement	1050 kg
Design Cat. CE	C
Crew	4/5
Sails	
- Mainsail	24 m ²
- Jib	8 m ²
- Gennaker	35 m ²
Designer	Piotr Kopczynski

Catamaran **N700K** is made in vacuum techniques out of glass, epoxy resin and core material Herex. Due to the technology and materials weight of the boat does not exceed 550kg with less than 130kg of single hull.

There are four single berths in two seven meters hulls. On deck layout is simple and easy for the crew to sail the boat efficiently. Mainsheet and traveler are both within arms reach of the helmsman so they can be trimmed or released easily. Yacht is equipped with two symmetrical board plates.

Catamaran **N700K** due to the sandwich construction is unsinkable. High beams connection give opportunity for fast sailing even on the rough waters. The hulls as well as other parts can be easily separated which gives the flexibility of transportation and selecting sailing spots. The boat could be easily packed into a 40ft container for Overseas buyers. A boat may be equipped with a centrally mounted outboard engine.

N700K is a fast, coastal racing or weekend cruising catamaran offering new opportunities to spend time on the water. On all points of sail the **N700K** is a pleasure to sail. Tacking is positive with backing of the jib not required. With the speed 20 knots plus, **N700K** outperforms significantly monohull yachts. Catamaran is light enough to be towed behind a compact car and simple enough to be rigged and sailed in under an hour. The boat can be launched from a hoist or ramp. Trampoline stretched between the hulls allow for a pleasant relaxing after an exciting sailing and in hot summers nights give possibility to sleep directly under the stars.

N700K is a small boat for big adventure!
